MORITZ CHAT ---

moritz@torservers.net
[19:12:23] <   Guest100> | hi is moritz here?
[19:13:10] <   gamambel> | Guest100: i here. i am moritz. what's up?
[19:13:27] <   Guest100> | fabio gave me your name and i should address to you
[19:14:11] <   Guest100> | there are some relations to http://spot-on.sf.net and the smaller gui client http://goldbug.sf.net
[19:14:22] <   Guest100> | this is a new tor like concept
[19:14:41] <   Guest100> | maybe you want to provide some kernels running on your servers too?
[19:14:54] <   Guest100> | we could then add the server IPs on the page of the apps..
[19:14:58] <   Guest100> | any idea?
[19:17:19] <   gamambel> | Guest100: it would have to be separate servers, the current servers are tor exits only.
[19:17:31] <   Guest100> | yah why not
[19:17:55] <   Guest100> | should we test the app? and functionality?
[19:19:44] <   Guest100> | a linked domain www.echoservers.net would be great
[19:20:03] <   Guest100> | then IP addresses could be listed there
[19:20:18] <   gamambel> | Guest100: i would have to know more about it. some of the main devs are german, right? maybe we can meet up and discuss it?
[19:21:02] <   Guest100> | yes of course. we can chat within the tool about it, i evaluated a lot and can answer most of the questions
[19:21:17] <   Guest100> | we can and should test it, natürlich.
[19:21:44] <   Guest100> | tell me when you have time and are ready and how to send you a key. we need to swap keys
[19:21:56] <   Guest100> | or we meed in the e*IRC room
[19:22:05] <   Guest100> | you use linux?
[19:22:27] <   gamambel> | yes
[19:22:42] <   Guest100> | have time now? i tell you how to compile
[19:23:03] <   Guest100> | want the zip source or svn souce ?
[19:23:42] <   Guest100> | compile spot first: https://sourceforge.net/p/spot-on/code/
[19:24:15] <   Guest100> | libs needed are listed here: http://spot-on.sourceforge.net/download.html
[19:24:43] <   Guest100> | and here: https://sourceforge.net/p/goldbug/wiki/compiling/
[19:25:52] <   Guest100> | you need to use Qt and compile gui.pro and kernel.pro. after the set of path to kernel.so and geoip.dat , you
        need to activate the kernel
[19:25:56] <   Guest100> | then we swap keys
[19:26:23] <   gamambel> | is there some way to reach you outside of the app itself? i don't really have time right now, and would like to

get back to you.

[19:26:30] <   Guest100> | and can chat 1:1 , if we dont swap keys we meet in the buzz = e*IRC channl

[19:26:39] <   Guest100> | of course

[19:26:50] <   Guest100> | give me your mail address, i mail you

[19:27:26] <   gamambel> | moritz@torservers.net

[19:27:31] <   Guest100> | ok

[19:29:01] <   Guest100> | sent

[19:29:01] <   Guest100> | got it?

[19:31:39] <   gamambel> | ya got it, thanks!

[19:32:05] <   gamambel> | sorry, i'm on the road the next 2-3 weeks. i'm not sure if i can find the time when i am.

[19:32:10] <   Guest100> | ok tell me when you are ready or need something

[19:32:13] <   gamambel> | but i'm definitely interested in following up on this

[19:32:25] <   Guest100> | its up to you

[19:32:37] <   Guest100> | any constructive contribution is welcome

7:33

he emailed me as Randolph D. <rdohm321@gmail.com>
moritz@torservers.net

[9/21/13 9:00:21 AM] Fabio Pietrosanti (naif): Hello?
[9/21/13 9:00:26 AM] Fabio Pietrosanti (naif): do we know each other?

[9/21/13 9:10:00 AM] cartoonhero: Hallo Fabio Pietrosanti (naif), ich möchte Sie als Kontakt aufnehmen. cartoonhero. cartoonhero
[9/21/13 9:10:31 AM] Fabio Pietrosanti (naif): Fabio Pietrosanti (naif) has shared contact details with cartoonhero.
[9/21/13 9:01:55 AM] cartoonhero: hi
[9/21/13 9:02:21 AM] cartoonhero: You wrote about GB Messenger
[9/21/13 9:02:32 AM] cartoonhero: I help to use it with some friends
[9/21/13 9:04:42 AM] cartoonhero: see me?
[9/21/13 9:04:58 AM] cartoonhero: [09:02:27] cartoonhero: I help to use it with some friends

<<<
[9/21/13 9:09:50 AM] cartoonhero: hello?
[9/21/13 9:10:36 AM] cartoonhero: hello
[9/21/13 9:10:48 AM] cartoonhero: you wrote about GB Messenger
[9/21/13 9:11:27 AM] cartoonhero: can you read me?
[9/21/13 9:11:28 AM] Fabio Pietrosanti (naif): Hi!
[9/21/13 9:11:31 AM] cartoonhero: Hello!
[9/21/13 9:11:35 AM] cartoonhero: thanks for writing
[9/21/13 9:11:42 AM] cartoonhero: now skype seems to let us connect
[9/21/13 9:11:46 AM] Fabio Pietrosanti (naif): that's a very cool project!
[9/21/13 9:11:51 AM] cartoonhero: you wrote about the Messenger
[9/21/13 9:12:01 AM] cartoonhero: Yes I try to help the project
[9/21/13 9:12:04 AM] Fabio Pietrosanti (naif): we are hermes center, we do also promotion of tools in hacktivists environments, meetings and projects
[9/21/13 9:12:11 AM] cartoonhero: good
[9/21/13 9:12:15 AM] Fabio Pietrosanti (naif): cool! i want to participate!
[9/21/13 9:12:16 AM] cartoonhero: include the messenger
[9/21/13 9:12:21 AM] cartoonhero: how?
[9/21/13 9:12:23 AM] Fabio Pietrosanti (naif): are there a chat of developers somewhere?
[9/21/13 9:12:25 AM] cartoonhero: the tool needs users
[9/21/13 9:12:27 AM] cartoonhero: and testers
[9/21/13 9:12:29 AM] cartoonhero: and writings
[9/21/13 9:12:32 AM] cartoonhero: and blog news
[9/21/13 9:12:42 AM] cartoonhero: yes you can chat with the developer
[9/21/13 9:12:53 AM] Fabio Pietrosanti (naif): irc?
[9/21/13 9:12:53 AM] cartoonhero: sometimes within the tool
[9/21/13 9:13:02 AM] cartoonhero: no of course in the tool
[9/21/13 9:13:12 AM] cartoonhero: there is an irc like challen inside
[9/21/13 9:13:18 AM] cartoonhero: channel
[9/21/13 9:13:27 AM] cartoonhero: how do you imagine to test and help ?
[9/21/13 9:13:32 AM] Fabio Pietrosanti (naif): wow!
[9/21/13 9:13:34 AM] cartoonhero: should we connect?
[9/21/13 9:13:41 AM] Fabio Pietrosanti (naif): Yes, yes!

[9/21/13 9:13:45 AM] Fabio Pietrosanti (naif): We can also help in raising funds
[9/21/13 9:13:54 AM] Fabio Pietrosanti (naif): As we are part of fundraising circles
[9/21/13 9:14:04 AM] cartoonhero: you need to understand the tool, I tested a lot and can help you
[9/21/13 9:14:08 AM] Fabio Pietrosanti (naif): and i expect that you or your team would benefit from money to work on the project!
[9/21/13 9:14:23 AM] Fabio Pietrosanti (naif): are you working as a volounteer or did you managed to dedicate a full time effort on it?
[9/21/13 9:14:34 AM] cartoonhero: yes there could be funds, the developer is making it for free in open source and if there is money, maybe he can work more on it
[9/21/13 9:14:46 AM] cartoonhero: all is open source and spare time
[9/21/13 9:14:58 AM] cartoonhero: so donate to the library developers
[9/21/13 9:15:03 AM] cartoonhero: spot-on.sf.net
[9/21/13 9:15:20 AM] cartoonhero: but money does not help most, users who use it are requested
[9/21/13 9:15:28 AM] cartoonhero: and chatservers like jabber servers
[9/21/13 9:15:38 AM] cartoonhero: set up a few and connect them
[9/21/13 9:15:47 AM] cartoonhero: though it is p2p
[9/21/13 9:15:50 AM] Fabio Pietrosanti (naif): yes, yes, it's nice!
[9/21/13 9:15:59 AM] cartoonhero: but firewalled users could use chat servers
[9/21/13 9:16:06 AM] cartoonhero: you use windows?
[9/21/13 9:16:06 AM] Fabio Pietrosanti (naif): where are you based? As we can organize an "Hackaton" and bring there some other groups for training of advocate?
[9/21/13 9:16:31 AM] Fabio Pietrosanti (naif): I'm based in Italy
[9/21/13 9:16:32 AM] cartoonhero: of course, do that, write to your email contacts to other contries to support it there as well
[9/21/13 9:16:37 AM] cartoonhero: this is what you can do
[9/21/13 9:16:39 AM] Fabio Pietrosanti (naif): but can move very easily around europe
[9/21/13 9:17:02 AM] cartoonhero: good to know, yes you can present the tool anywhere you like
[9/21/13 9:17:18 AM] cartoonhero: shoudl we test it now?
[9/21/13 9:17:23 AM] cartoonhero: did you looked around already?
[9/21/13 9:17:28 AM] Fabio Pietrosanti (naif): now i need to get out for breakfast!
[9/21/13 9:17:31 AM] cartoonhero: we need to exchanges keys
[9/21/13 9:17:34 AM] Fabio Pietrosanti (naif): however i can start promoting it on my blogpost
[9/21/13 9:17:36 AM] Fabio Pietrosanti (naif): http://infosecurity.ch/20110112/zorg-new-c-and-java-zrtp-implementation-public-release/
[9/21/13 9:17:37 AM] cartoonhero: thanks
[9/21/13 9:17:41 AM] cartoonhero: good
[9/21/13 9:17:43 AM] Fabio Pietrosanti (naif): here i write a lot of security
[9/21/13 9:17:44 AM] Fabio Pietrosanti (naif): have a look
[9/21/13 9:17:54 AM] cartoonhero: yes very good
[9/21/13 9:18:29 AM] cartoonhero: did you understand the machanism of the tool?

[9/21/13 9:18:39 AM] cartoonhero: it is RSA with AES on SSL
[9/21/13 9:24:03 AM] Fabio Pietrosanti (naif): more or less, i need to test it deeply
[9/21/13 9:24:23 AM] Fabio Pietrosanti (naif): listen, let's talk later during the weekeend
[9/21/13 9:24:39 AM] Fabio Pietrosanti (naif): so i can test the tool better
[9/21/13 9:24:59 AM] Fabio Pietrosanti (naif): and we can identify the right way to promote the tool
[9/21/13 9:25:46 AM] Fabio Pietrosanti (naif): Do you also do translation of the tool?
[9/21/13 9:26:44 AM] cartoonhero: there is a translation in the subpath
[9/21/13 9:27:00 AM] cartoonhero: and as it is QT , you can use Qt Linguist to translate
[9/21/13 9:27:10 AM] cartoonhero: it is a XML file you edit with the Qt Linugist tool
[9/21/13 9:27:13 AM] cartoonhero: and anyone can help
[9/21/13 9:27:21 AM] cartoonhero: yes that would be worht a founding
[9/21/13 9:27:27 AM] cartoonhero: to have lot os good translations
[9/21/13 9:27:43 AM] Fabio Pietrosanti (naif): eh, yes
[9/21/13 9:27:44 AM] cartoonhero: the translations can be easily updated with the L-release tool in Qt
[9/21/13 9:27:47 AM] Fabio Pietrosanti (naif): translation keep a lot of effort
[9/21/13 9:27:48 AM] cartoonhero: that needs to be done
[9/21/13 9:27:51 AM] cartoonhero: right
[9/21/13 9:27:55 AM] cartoonhero: there is spot-on.sf.net
[9/21/13 9:27:59 AM] cartoonhero: and the GB
[9/21/13 9:27:59 AM] Fabio Pietrosanti (naif): with the openit there is the translation hub that support to do it
[9/21/13 9:28:09 AM] cartoonhero: both have a similar gui, but differnet languages
[9/21/13 9:28:12 AM] Fabio Pietrosanti (naif): but you need to be a legal entity to make an agreement with them
[9/21/13 9:28:13 AM] cartoonhero: so both need to be promoted
[9/21/13 9:28:19 AM] cartoonhero: spton is the library
[9/21/13 9:28:23 AM] Fabio Pietrosanti (naif): did you guys setup a non profit stuff?
[9/21/13 9:28:33 AM] cartoonhero: what is that?
[9/21/13 9:28:48 AM] cartoonhero: i am only a tester and as fat as I see all is a hobby of professionals
[9/21/13 9:28:58 AM] cartoonhero: very highly skilled professionals
[9/21/13 9:29:00 AM] cartoonhero: so the code is ok
[9/21/13 9:29:13 AM] cartoonhero: i think there is no corporate or finance behind it
[9/21/13 9:29:17 AM] Fabio Pietrosanti (naif): to make a funding agreement for translation support, the project need to be managed by a legal entity, tipically a non-profit association or foundation
[9/21/13 9:29:19 AM] cartoonhero: make it a community support
[9/21/13 9:29:26 AM] cartoonhero: yes do that
[9/21/13 9:29:32 AM] cartoonhero: you can fork anything
[9/21/13 9:29:43 AM] Fabio Pietrosanti (naif): but i don't want to fork, i would like to help the project

[9/21/13 9:29:46 AM] cartoonhero: you need to see yourself as an acteur and not supporter
[9/21/13 9:29:49 AM] Fabio Pietrosanti (naif): fork() means a loss of energy
[9/21/13 9:29:57 AM] cartoonhero: then mirror
[9/21/13 9:30:18 AM] Fabio Pietrosanti (naif): are you coming to the OpenITP Circumvention Summit in Berlin next week?
[9/21/13 9:30:28 AM] Fabio Pietrosanti (naif): i see from skype that you are there in Berlin
[9/21/13 9:30:42 AM] Fabio Pietrosanti (naif): so we can meet there and i can introduce you to the guys for the translations to multiple languages!
[9/21/13 9:31:21 AM] Fabio Pietrosanti (naif): https://www.openitp.org/openitp/circumvention-tech-summit.html
[9/21/13 9:31:22 AM] cartoonhero: unfortunately not
[9/21/13 9:31:45 AM] cartoonhero: you are familiar with IT ?
[9/21/13 9:32:10 AM] cartoonhero: some people complained about their own questions not to know what a listener etc is.
[9/21/13 9:32:23 AM] cartoonhero: so we need a manual to explain as well and some test environments
[9/21/13 9:32:40 AM] cartoonhero: okay if you want to test the tool and connect in chat or IRC Buzz then we can do
[9/21/13 9:32:47 AM] cartoonhero: I am here most often
[9/21/13 9:32:51 AM] Fabio Pietrosanti (naif): cool, i like it
[9/21/13 9:32:54 AM] Fabio Pietrosanti (naif): let's stay in touch and talk later on
[9/21/13 9:32:55 AM] cartoonhero: you use windows or linux?
[9/21/13 9:33:01 AM] cartoonhero: ok we do!
[9/21/13 9:33:24 AM] cartoonhero: i think the first step is not to work, but to connect to others to let them know, globally
[9/21/13 9:33:32 AM] Fabio Pietrosanti (naif): Mostly windows, sometime osx
[9/21/13 9:33:37 AM] cartoonhero: use your email lists
[9/21/13 9:33:38 AM] cartoonhero: ok
[9/21/13 9:33:52 AM] cartoonhero: the spoton.exe is the full gui in the installer
[9/21/13 9:33:57 AM] cartoonhero: you can use that as well at any time
[9/21/13 9:34:04 AM] cartoonhero: so you see the full functions
[9/21/13 9:34:08 AM] Fabio Pietrosanti (naif): cool
[9/21/13 9:34:09 AM] Fabio Pietrosanti (naif): i now got to go
[9/21/13 9:34:11 AM] Fabio Pietrosanti (naif): talk you later!
[9/21/13 9:34:14 AM] cartoonhero: bye
[9/21/13 9:34:18 AM] Fabio Pietrosanti (naif): we can do good things! :-)
[9/21/13 9:34:26 AM] cartoonhero: then you should do
[9/21/13 9:09:35 AM] cartoonhero: Call started
[9/21/13 9:09:35 AM] Fabio Pietrosanti (naif): Call ended – no answer
