Title: Scotland's Post Office and Windmill Scandals May Be Historic

They say it could be a whale of a crime scene. [The Endangered Species Act](#) prompts no arrest warrant is required. The culprits? Seemingly, politicians. The victims? Windmills and Whales. The plot? To muddy [the political waters spanning the Atlantic Ocean](#) coast to coast. The fanciers? [Five times count Felsons](#). The litigation finance connection? Scotland's [Post Office Scandal](#) potentially can pay for itself.

As Litigation Finance Journal has reported, the people of Scotland are party to new Parliament action billed the [Moveable Transactions \(Scotland\) Bill](#). Ironical that Windmill turbines move in circles this as legal scholars suggest that the most famous [ESG Windmill litigation was won in Scotland](#).

Meanwhile, Scotland is home to one of the most famous computer software crime dramas ever, [branded the Post Office Scandal](#).

The Atlantic Ocean spanned the Trump administration. Mr. Trump paid the people of Scotland to settle the aforementioned ESG Windmill claim. Meanwhile, Mr. Trump (for whatever reason) then got himself into the [Windmill business in the United States](#) ... The first and largest Windmill farm in American history.

There is one place on the planet Atlantic Right Whales go over Summer to feed. Atlantic Right Whales are on the Endangered Species List. Logical legal interpretations question if the Windmills in Scotland were party to political manipulation in the United States.

The Atlantic Right Whale population holds various protections under the Endangered Species Act. Some include:

- The judges of the district courts of the United States and the United States magistrates may, within their respective jurisdictions, upon proper oath or affirmation showing probable cause, issue such warrants or other process as may be required for enforcement of this Act and any regulation issued thereunder.
- Such person may make arrests without a warrant for any violation of this Act if he has reasonable grounds to believe that the person to be arrested is committing the violation in his presence or view, and may execute and serve any arrest warrant, search warrant,

or other warrant or civil or criminal process issued by any officer or court of competent jurisdiction for enforcement of this Act.

The Atlantic Right Whale has some of the most recognised mammal rights on the planet and are threatened by Windmills. The people of Scotland are experts at Windmill litigation finance.

It does not take the Da Vinci Code to put this all together:

1. Scotland's Post Office Scandal is a software claim now historic as covered by Litigation Finance Journal. Scotland's ESG windmill claim was a litigation finance win.
2. How Scotland's Post Office Scandal paid 555 claimants is a litigation investment win. But, there are 735 Post Office Scandle software computer crime scenes.
3. When you put the two scandal wins together (Windmills and Post Office) we see Scotland is a third party investment unicorn.

There are only a little more than 300 Atlantic Right Whales swimming now. Post Office Sandals victims yet vindicated are the same in numbers. Scotland can engage the Movable Transactions Bill (windmill turbines move) to pay for the future of Endangered Species and software computer crimes like the Post Office Scandal.

Mr. Trump may or may not be involved with harassing the Atlantic Right Whales. But, both Windmill sagas Mr. Trump is party to. As a unicorn, the Scotland litigation finance industry could pay for the Post Office Scandal's misgivings via Windmill and Whale innovation.
